Description

The Larson Cabrio 370 is a fully equipped inboard cruiser with luxurious cabin accommodations and a spacious cockpit designed for live aboard cruising and dockside entertaining. The V-drive inboard-powered 370 offers a spacious interior and cockpit. The cockpit features two seating sections divided by a moulded wet bar to port. Below the wet bar the life raft and life jackets are safely stored in a locked compartment, the aft area features a wrap-around seating section to starboard with storage below. Forward of the wet bar is a settee area facing the helm, with a lounge backrest against the console and storage below. Complete engine instrumentation is presented on a woodgrain dash panel including a remote spotlight and VHF radio. The transom features a hot/cold shower and locking dunnage box with drained liner. The standard radar arch is equipped with a spreader light. The cabin entry leads directly to a spacious galley, with cabinets trimmed in cherry wood. A polished stainless steel sink is set in a granite look counter top. A two-burner electric stove, microwave, coffee maker and full-size dual-voltage refrigerator, also trimmed in cherry wood, round out this complete galley. There is abundant storage above and below the galley work area. A curved dinette is to port, backed by cabinetry holding a 15-inch flat-screen TV and a Sony bluetooth audio system. A bi-fold companionway separates the galley area from the master stateroom forward, featuring a full-size berth and storage including a cedar-lined hanging locker. There's a private entry from the master stateroom to the head, which features a stand-up shower, moulded vanity, and a Vacuflush head. The mid-cabin features another full-size berth and a screen port for ventilation.
