INTRODUCING

A powercat focused on performance and comfort

The Leopard 39 Powercat is an innovative, efficient and spacious yacht that incorporates the best features of a much larger yacht to bring you an exciting midsize catamaran.

With a vision of creating an economical and intelligently designed power catamaran with global cruising capabilities, the team of award-winning designers at Robertson & Caine not only drew upon the success of previous models, but also learned from feedback of global owners and cruisers.

Features on the Leopard 39 Powercat include a spacious raised flybridge with helm station and hardtop, three cabin interior layout, full galley and saloon, plus an open cockpit.

Powered by two inboard diesels with several engine choices and coupled with an efficient hull design, the Leopard 39 Powercat offers exceptional fuel efficiency and range. The innovative stepped hull design increases volume while minimizing the wetted hull surface, giving exceptional load carrying capacity and ensuring optimal performance.

CRAFTMANSHIP

Innovation, quality and stability

The Leopard 39 Powercat offers exterior living space unparalleled in its class. As you step onto the yacht from its open transom, you will enjoy a large covered cockpit. This area features a molded dining table and comfortable seating for up to eight guests with built-in storage lockers.

The entire aft section of the single level cockpit may be configured as a separate socializing area, with a rear seatback that allows you to face fore or aft.

The available stainless steel davit features an electric winch for ease of storing and launching your dinghy, keeping your transom and swim platforms clear.

A curved molded staircase with stainless steel handrail takes you to the flybridge,

featuring wrap around seating with padded backrest and a functional cocktail table.

Moving aft is a full helm station with large bench seat and a continuous stainless steel handrail. A hardtop cover with optional solar panels offers protection from the elements and can be fully enclosed.

INTERIOR

Space and comfort for your voyage at sea

The Leopard 39 is available in a luxurious three cabin owner layout. Two guest cabins are located in the port hull with a shared central head and stall shower.

Well ventilated with opening hatches and ports, the cabins offer plenty of storage and excellent lighting. Adjustable reading lights, full size hanging lockers and shelving add to the practicality and comfort of this area.

The starboard hull is dedicated to the stylish owner's suite with a spacious master cabin and private head forward with a large stall shower. Amenities include washbasin with mixer tap, shower with adjustable shower head, corian vanity unit and marine toilet.

Located aft, the master stateroom features a large double berth, book shelf, adjustable reading lights, hanging locker, plenty of shelving for clothing and personal items, as well as additional storage under the bunk. Two opening hatches and two opening ports provide excellent ventilation.

The master suite incorporates a separate study area with dedicated desk, overhead lighting and an optional swing seat.

COMFORT

Luxury with a contemporary design

Soft overhead lighting throughout the saloon, corian surfaces in the galley, and micro-fiber fabrics in the seating areas add a luxurious feel with proven, durable materials. Interior color options are available.

Large windows provide panoramic views and allow natural light into the saloon while large opening hatches afford ample ventilation.

The spacious saloon of the Leopard 39 Powercat features an aft-facing galley-up design. The galley layout features soft curves and heat-resistant Corian counter tops. Fully equipped with a standard stainless steel stove with oven and broiler, a deep sink with mixer tap and ample counter and cabinet space, this galley is ergonomic and practical.

To starboard, a large refrigerator-freezer system, with well-insulated and stylish drawer opening compartments and stainless steel faces and handles provides ample storage for your provisions.

INNOVATION

The Leopard Leap

Powered by two inboard diesels with several engine choices and coupled with an efficient hull design, the Leopard 39 Powercat offers exceptional fuel efficiency and range. The innovative stepped hull design increases volume while minimizing the wetted hull surface, giving exceptional load carrying capacity and ensuring optimal performance. The stainless steel davit features an electric winch for ease of storing and deploying a dinghy while creating additional space on the transom and saving valuable weight astern.
